As a leading brand in mobile communication industry, Far EastTone released the first version of the "Supply Chain Management Policy" in 2017. After five years of implementation, our effort in supply chain management has been recognized by a number of domestic and foreign sustainable evaluation organizations, including the CDP (Carbon Disclosure Project) Leadership Class Enterprise Award in Supplier Engagement Rating Category, TCSA (Taiwan Corporate Sustainability Award) Supply Chain Leadership Award, etc.

In 2022, Far EastTone become the first telecommunications company in Taiwan which is certified to ISO 20400 Sustainable Procurement Guidelines by third party. These achievements demonstrate that Far EastTone is working together for sustainable development with the support and assistance of the supply chain. Far EastTone Telecom's Procurement Office will rename the original "Supply Chain Management Policy" to "Supply Chain Sustainability Management Policy" in line with international movements driven by the promotion of international ESG sustainability issues and COP26 net-zero carbon emissions to improve sustainable performance in supply chain continuously which is an essential support to Far EastTone's sustainable growth and providing the best social and environmental friendly telecommunications services to customers.

- Far EastTone Commitments in supply chain management are including:
1. Implement the requirements of the International Institute for Supply Chain Management (ISM), including anti-corruption, diversity and inclusion, the environment, corporate ethics, financial integrity, global citizenship, health and safety, human rights, labor rights, sustainable supply chain and transparency a total of 11 Sustainability and Social Supply Chain Management Guiding Principles.
  2. Based on the ISO20400 Sustainable Purchasing Guidelines, continue to strengthen supply chain management, improve supply chain market performance indicators including QCDS (Quality, Costs, Delivery and Service) performance and ESG (Environmental, Social and Governance) performance, and work with supplier partners to create a high-quality and resilient supply chain.
  3. Actively respond to climate change and global net zero issues, guide and assist the supply chain in the implementation of carbon inventory-reduction-neutralization, and work towards net zero together with supply chain partners.
  4. Work with the supply chain to exert core capabilities, face the sustainable risks in Taiwan, respond to the expectations of stakeholders, and fulfill the due responsibilities of a corporate citizen.
